

Self-priming pump  
**SP PUMP**

Self-Priming pump type SP

The centrifugal, mechanical seal, self-priming electropumps made of polypropylene are particularly designed for the use of corrosive acid and alkaline solutions or for liquid that cannot be in contact with metals. No mechanical part is in contact with the process fluid. The polypropylene allows the use of liquids with a max working temperature of 90°C.

**MAIN CHARACTERISTICS**

- Capacity: up to 55 m<sup>3</sup>/h
- Head: up to 40 m H<sub>2</sub>O
- Temperature: up to 90°C
