

Electronic dosing pump
ITADOSE EDP

Itadose EDP

Nowadays dosing pumps are essential equipment in order to feed the chemical tanks with right amount of liquid chemical; it can be added continuously, keeping the concentration of the solution always constant.

This range of metering pumps are equipped with a set-in transformer which ensures that the electronic parts are functioning free from feeder mains and consequently, free from voltage variations as well.

- Pump casing is made of aluminium protected with a double layer of epoxy paint (standard) or, on request, a teflonated case (green colour).
- The control panel is protected by a trans-

parent polycarbonate cap gasket

- Internal protection by a back panel with gasket

CHARACTERISTICS

- Capacity can be controlled manually by means of a special knob
- Double scale flow reading

A wide range of models with different and controlled capacities from 0,1 lt/h up to 80 lt/h are available.

The Italtecno technical service will be available when choosing the suitable dosing pump.
