# HEXIES

Hexies are polypropylene floats, hexagonal in shape, with smooth rounded sides. Their unique design creates a "work through" blanket that saves energy and reduces costs by dramatically decreasing heat and fluid loss, while suppressing odors.

**COMPARED TO SPHERE-SHAPED FLOATS**

- Hexies require only one layer for complete coverage
- Hexies solid construction prevents sinking

- Completely resistant to all metal finishing chemicals
- Field evaporation tests show that the Hexies provide up to 70% reduction in fluid loss
- Heat losses reduced by 80% means dramatic savings in fuel costs

**TWO SIZES AVAILABLE**

- 50 mm. (430 pieces per square meter)
- 100 mm. (100 pieces per square meter)
